

RESIZE PHOTO FILES with PHOTOSHOP IMAGE PROCESSOR

Use Adobe Bridge to select the files to be processed. From there the files are opened and batch processed in Photoshop Image Processor. This process is necessary to resize the files for the Hyper-Duplet page to 400 x 600 pixels (or 600 pixels max.)

in Adobe Bridge

run Adobe Bridge
navigate to the folder containing all of your photos
select all photographs
EDIT> SELECT ALL [CMD] A
resize the photos
TOOLS> PHOTOSHOP> IMAGE PROCESSOR...

in Adobe Photoshop

1- Select images to process
this will process all pictures from Bridge
2- Select location to save processed images
save in same location
a new folder named JPEG will be created,
no files will be overwritten
3- File type
Save as JPEG (necessary for web display)
quality = 10
convert profile to sRGB
Resize to fit
width = 600 px, height = 600 px
this will set the maximum width or height
and will 'constrain proportions'
hit [RUN] button
