There are many other interesting places between these galleries and eateries. Check them out. The Ginza area will take a whole day, and maybe two, one for the top and another for the bottom. Phew!

At night Ginza becomes the most amazing and sophisticated area for small restaurants and private clubs. The signage alone is mind-boggling. Every building has 5 to 7 stories and each floor has a place or two, and each has its own sign! This is one of the most expensive neighborhoods in Tokyo, so be careful.

note: these galleries open and close all the time, so this list may not be perfectly accurate.
